

PURPOSE:

The purpose of this best practice is to identify safe zones and reduce employee exposure from falling objects during lifting, bailing, and driving of piles.

PROCESS:

- The recognized safe zone for driven pile operations includes the areas to the sides and rear of the pile.
- The radius of this zone is no less than 30' from the pile to be driven.

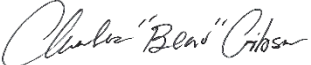

PAYOFF:

By following this best practice, the likelihood of employee injury from falling objects is significantly reduced, creating a safer work environment.

Crew Review:

Superintendent: Instruct the crew to use their phones to scan one of the QR codes below, which will direct them to a short review session. After personnel enter their information and submit it, training records will be generated and automatically saved for future reference. Utilize this time for open engagement with the crew. Each review will have different questions, which can be answered either as a team or individually.
