

# The Pile Times

## Deep Foundations

November 2022

**2022 Year-in-Review** by Chris Normand BU15 Vice President

Greetings to all BU15 personnel. I want to start off by saying that Cajun does not exist without all of your hard work and dedication in completing projects. 2022 developed into a very exciting and busy year. During this post-Covid period, our team rebuilt and emerged stronger than ever before. We grew our capacity, both in the field and the office, to successfully execute all of our projects.

I'm particularly very proud of our group's outstanding safety performance this year. We have consistently shown on project after project that we can grow our staff, work more man hours, and explore new work arenas all without sacrificing safety. Thank you for the part you played into this year's success !

Several 2021 projects were winners of national awards in 2022 - Entergy Gibson flood protection, Valero DGD3, and Amazon Project Pine. Other projects from 2022 have also been submitted for awards not yet announced. Great job

everyone !!!

**2022 At-a-Glance**

**9 States**

**54 Projects**

**310,305 Safe Man-Hours Worked**

Brannon Patin	Derek Alexander	Brad Dupuis
Tony Petitjean	Colby Quebedeaux	Brandon Graham

**Vision: Cajun is the company of choice by:**

- Putting our employee's health and safety above all else
- Exceeding the expectations of our clients
- Striving for operational excellence

**Mission:**

**We grow our people to grow our company**

**Bringing Cajun's Mission to Life: by Colton Possoit Corporate Training Facilitator**

With the assistance of Colin Clement (Construction Support Services Crane Specialist), Cajun DF personnel participated in a five-day NCCCO Crane Operators course at our Westport facility. Pictured from left: Mark Buff, Kyle Dozier, Brandon Graham, Ronald Rome, Tre Langla, Justin Williams, Alex Courville, Harry Brockmeyer and Instructor Colin Clement.

**CAJUN WIN**

Cajun DF continues its recent success with the award of the Chevron Phillips Chemical—USGC II OSBL project located in Orange, TX. The scope covers 107 pre-cast concrete test piles, along with 8,652 production piles. Cajun kicked off the test pile program in early October and will follow with installation of production piles starting January 2023. Good luck and congratulations to the project team as they embark on this upcoming project.
