

The Pile Times

Deep Foundations

September 2022

22-512 Plaquemines LNG Substation

Cajun crews recently completed the PLNG Substation in Plaquemines consisting of 288 Pre-Cast Concrete Piles with lengths of 90' and 120'. Great job everyone !!!

22-507 ExxonMobil Raw Water Intake Structure

The crew at Exxon recently completed an extremely challenging project involving installation of a temporary sheet-pile coffer dam in an existing waterway. The project utilized Cajun's Geiken Silent Piler and depended on a well-executed JHA which the crew followed with precision and skill.

Vision: Cajun is the company of choice by:
 - Putting our employee's health and safety above all else
 - Exceeding the expectations of our clients

Mission:
 We grow our people to grow our company

CALUMET DRILLED SHAFTS

Cajun was contracted by Burns & McDonnell and mobilized in November of 21' in support of the Montana Renewables Project, which is focused on creating renewable fuel. Cajun's original scope was scheduled for a 2-3 month duration. Due to consistent, safe, productive work, Cajun's contracted scope grew. Almost a year later, we are coming home. In all, Cajun installed almost 1000 drilled shafts at the Calumet Refinery in Great Falls, MT. With the significant challenges faced of installing these shafts in rock and other challenging geotechnical conditions, in which the majority of the drilling time was during the winter months, causing days where concrete could not be placed, it's an amazing accomplishment. On this project, we had almost 50,000 man-hours onsite placing close to 3,000 yards of concrete in these drilled shafts. The team accomplished this with zero incidents, and zero injuries !! Cajun's Calumet team worked together as "One Cajun" and were very well aligned in their goals: to work safely, provide a high quality product, all while staying on schedule. Thank you to the Calumet Team for a very successful year. Thank you to Cajun's site leader, Jonathan Sharp, BU15 Supt.'s—Chris Baehr, Charles Vignes, BU04 Supt. Cesar Luna, Site Safety Manager, Lance Bradley, previous Site Safety Manager, Edgar Moreno, QA/QC Manager, Mario Diaz, Surveyor, Noe Rios, Foreman's Brandon Dupuy, Spencer Comb, Christian Cantu, & Jesus Garza, BU15 Personnel, Blaise Darbonne, Davon Coles, Randy Horn, Kris Shoaf, Hunter Kidder, Cristian Jimenez, as well as all of the other dedicated Cajun personnel who worked on this project. Job well done !
