

Bringing it **BACK HOME!!!**

In August of this year, Cajun Deep Foundations was awarded the most prestigious safety award that the ADSC has to offer. The ADSC (**The International Association of Foundation Drilling**) awarded the Rick Marshall Excellence in Safety award to Cajun Deep Foundations at this year's ADSC Summer meeting. The Rick Marshall Excellence in Safety award is presented annually to the company that demonstrates a comprehensive and consistent safety program, beginning at the highest administrative level, filtering down throughout the entire company culture to the most basic field operations. This is the 3rd time that Cajun Deep Foundations has been selected for this honor. Cajun is in a class of its own being the only three-time winner of this prestigious award. Cajun Deep Foundations was also selected in 2009 and 2011 to receive the Rick Marshall Excellence in Safety award. Mark Mumford, Cajun Deep Foundations Division Safety Manager, started in his newly promoted position back in October of 2016. One of his first commitments to Scott Callaway, President of Cajun Deep Foundations, was to bring the Rick Marshall Excellence in Safety award back to Baton Rouge and do this in honor of the late Chris Jacob. This award is another testament to Cajun's commitment to safety. Thank you to all the men and women out in the field executing our work on a daily basis. The effort and commitment that each of you in the field has to keep your fellow employees safe and out of harm's way does not go unnoticed. Thank You! Also, thank you to Becky Poche and Mark Mumford for assembling an award winning submittal. This one is for you, Chris.

Travis Parker- Operations Manager – Drill Shafts

Cajun Deep Foundations' vision is to be the premier full service deep foundation company providing un-paralleled foundation solutions on land and water.

Robert “Rob” Baker

I had the pleasure of interviewing Robert “Rob” Baker on the eve of his 7-year anniversary with Cajun Deep Foundations, LLC. We met onsite at Lyondell Bassell in La port, TX to discuss why he values Cajun’s safety culture and his experiences as an active member in it. The man from Bay St. Louis, MS has always been a leader within his Cajun team and a Foreman since 2013. When asked what he likes about his profession he replied, “This is my office”. He described a love for driving piles and being very involved in the work. Rob can be observed doing just that on a job site. Everything from leading a Pre-Task meeting, preparing a work area, and coordinating with other contractors, Rob ensures that pile driving operations are conducted as smoothly as possible. I asked Rob what has been his favorite job so far at Cajun that he can remember (he is an older man) being on but before he could answer the question he sees something going on in the work area. A pin was found on the ground under the leads so Rob sprang into action. He coordinates what needs to happen to fix the recognized hazard. He makes a call to the supervisor, updates the pre task and gets it handled. Without skipping a beat, Rob returned and told me about the Domino Sugar Refinery in Arabi, Louisiana. The crew was taken on a tour of the refinery and could often smell the sweet scent of the sugar being made onsite. Rob also talked about the future with Cajun Deep Foundations. He describes having a proud feeling about being a part of our 5 year recordable free safety record and looks forward to attaining that title again. In the same serious tone, I asked Rob why safety was important to him. He said, “These guys are my family, I spend more time with them than I do with anybody else on the planet”. Not only does Rob take working safe personal but he relates safe work to future jobs. He said, “I like to work”, meaning the safer we are the more jobs will continue to come for Cajun. Rob is a valued member of Cajun’s pile driving force and his dedication to safety is what the company strives to instill in all of its employees. Great things are happening for Cajun Deep Foundations and they will continue to because of team members like Rob.

Kyle Ambeau – Project Safety Coordinator

HUNTING IS HERE

According to a recent survey, hunters accidentally shoot approximately 1,000 people every year in US and Canada. Another activity that has its share of incidents is the use of ATV/UTV’s. Traversing to and from the hunting area over rough terrain by over confident riders can be fatal. Here are just a few Safety Tips to remember:

Gun Safety Tips	Tree Stand Safety Tips	ATV/UTV Safety Tips	General Safety Tips
Be Familiar with your firearm	Never climb tree or stand with loaded gun	Wear proper safety gear	Wear hunter orange above the waistline at least 400 sq inches
Always assume gun is loaded	Keep cell phone on your person	Stay off public roads	Carry a flashlight
Your finger should only be on the trigger when intend to shoot	Perform tree stand maintenance with at least other one person	Don't drive under the influence	Dress for the weather
Practice muzzle safety and awareness	Replace worn and weathered steps and straps	Supervise kids	Avoid alcoholic beverages while hunting
Never cross fence, jump ditch with loaded gun	Always use a rope to pull up gun or bow	Always unload firearms before riding in any vehicle, including ATV’s/UTV’s	Always tell someone where you are going and when you plan to return
Never point your gun toward another person	Never shoot towards another hunter	Do not overload the ATV/UTV	Bring a compass or GPS with you
Know what is behind your target	Wear an anchored body harness	Stay off public roads	Avoid hunting alone when possible

Cajun Deep Foundations’ mission is to be the industry leader creating sustainable value for our clients and for the benefit of our community

Marathon Galveston Bay Refinery - Continued Success

Marathon Petroleum Corporation acquired their Galveston Bay Refinery from British Petroleum (BP) in 2013 for \$2.4 billion dollars. Since the acquisition, Marathon has made a commitment to change the safety culture within the refinery by largely investing in renovation and maintenance of the facility. These investments have provided Cajun Deep Foundations several opportunities to complete numerous projects while showcasing our commitment to safety, and ultimately providing Marathon with a quality product.

Since February of 2017, Cajun Deep Foundations has been contracted to complete several scopes within the Galveston Bay Refinery. Upon arrival, CDF's first scope included the installation of drilled shafts, and upon completion, transitioned into installing helical piles during Marathon's Spring turnaround. Following the turnaround, Cajun has been tasked with completing multiple work packages throughout the refinery, utilizing an array of piling applications.

Completed Scopes:

- Helical Piles
 - 138 Helical Piles
 - Diameters ranging from 4.5" OD to 9.625" OD
 - Lengths ranging from 40' to 75'
- Drilled Shafts
 - 107 Drilled Shafts
 - Diameters ranging from 24" to 36"
 - Lengths ranging from 12' to 35'
- Sheet Piles
 - 125 WF PZ-27 @ 30' Long
 - 800 WF SKL-10's @ 20' Long

A team effort between Cajun Deep Foundations, Cajun Constructors and Cajun Engineering Solutions has proven to be successful with respect to the most recently issued work package. The Cajun team provided Marathon with several value-engineering approaches to build a cofferdam for a critical lift station on Marathon's WWTP Project. Because of the team's creative design and competitive pricing, Cajun was chosen as the successful bidder to complete the cofferdam construction, which will take place in early 2018.

Alex May - Assistant Project Manager

SWA Slogan Contest Winners

Back in the May edition of *The Pile Times*, we brought the spotlight to one of our simplest but most effective programs: *Stop Work Authority*.

We kicked off a campaign to stress the importance of **SWA** with a letter from Cajun Deep Foundations' President, Scott Callaway, emphasizing Cajun's support for any employee who speaks up to stop a potentially unsafe act or condition. We followed up by asking every member of our team to sign a pledge committing to the basic principles of safe work and the use of SWA. After some basic training and a follow-up survey, we asked for your best SWA slogan for a chance at winning one of three prizes. We had an overwhelming response to the contest and would like to say **thank you** to everyone that participated. The votes have been counted and the results are in...

- ★ **1st Place: Die Cast Model Crane Winner - Todd Williams**
"SWA... When standing your ground keeps you above it"
- ★ **2nd Place: \$100 Visa Gift Card Winner - Justin Miller**
"When in doubt, SWA is your way out"
- ★ **3rd Place: \$50.00 Visa Gift Card - Steve Badoin**
*"Stop the job *instead of* a heartbeat. Use SWA."*

-Mark Mumford – Safety Manager
